4) We can supply good price and service.

5) Packing detail: inner packing: paper bag, fresh bag, apple

outer packing: carton

20kg/18kg:80/88/100/113/125/138/150/163/175/198

6)Except the Red Star apple, we also can supply some other kinds of apple, such asHuaniu, Gala, HuaGuan, Fuji, QinGuan, Ji Guan, Golden delecilious....

Applications:

- 1.As fresh fruits, they are often eaten raw.
- 2.Making freshly pressed apple juice.
- 3.Making canned fruits.

Apples are an important ingredient in many desserts, such as apple pie, apple crumble, apple crisp and apple cake. They are often eaten baked or stewed, and they can also be dried and eaten or reconstituted (soaked in water, alcohol or some other liquid) for later use. Puréed apples are generally known as apple sauce. Apples are also made into apple butter and apple jelly. They are also used (cooked) in meat dishes.

In the UK, a toffee apple is a traditional confection made by coating an apple in hot toffee and allowing it to cool. Similar treats in the US are candy apples (coated in a hard shell of crystallized sugar syrup), and caramel apples, coated with cooled caramel.

Apples are eaten with honey at the Jewish New Year of Rosh Hashanah to symbolize a sweet new year.

Farms with apple orchards may open them to the public, so consumers may themselves pick the apples they will purchase.

Sliced apples turn brown with exposure to air due to the conversion of natural phenolic substances into melanin upon exposure to oxygen. Different cultivars vary in their propensity to brown after slicing. Sliced fruit can be treated with acidulated water to prevent this effect.

Specifications:

- 1) Color 80% & up
- 2) High sugar content
- 3) Specification:6.5--8.5cm
- 4) Supplying all the year around
- 5) Manufacture
- 6) Specification:

20KG/CTN	64/72/80/88/100/113/125/138/150/163/175/198
18KG/CTN	64/72/80/88/100/113/125/138/150/163/175/198
15KG/CTN	48/54/60/66/70
10KG/CTN	28/32/36/40/44
9KG/CTN	24/26/28/30/32/36/40/44
4KG/CTN	20/23/25/27

Diameter:

6.5-7.5cm, 7.5-8.0cm, 8.0-8.5cm, 8.5cm and up

The average weight of Fuji apple is 200 -380gram, maximum weight of up to 400 gram or more

Competitive Advantage:

1. We have our own factory & guarantee the quality
2. We have enough supply ability
3. We can supply more competitive price and service

Storage

Commercially, apples can be stored for some months in controlled-atmosphere chambers to delay ethylene-induced ripening. Apples are commonly stored in chambers with higher concentrations of carbon dioxide and high air filtration. This prevents ethylene concentrations from rising to higher amounts and preventing ripening from occurring too quickly. Ripening continues when the fruit is removed from storage. For home storage, most varieties of apple can be held for approximately two weeks when kept at the coolest part of the refrigerator (i.e. below 5 °C). Some types, including the Granny Smith and Fuji, can be stored up to a year without significant degradation.

Fresh Fuji apple detail	
Product name:	Delicious Fresh Yantai Red Fuji Apple No Spots With Suitable Sour Sweet, timely delivery, team professionals
Place of origin	Shandong
Feature:	1) fresh, crisp, juicy 2) nutritious, high quality, good for health

Price term:	FOB QINGDAO, CNF, CIF
Delivery time:	Around 7 days after receipt of 30% deposit
MOQ:	1X40'FCL
Shipment port:	Qingdao, China, China main port
Our Advantage	
Quality control	we are strict with the quality, All 2012 new crop fresh red apple
Experience and Service	we're producer & supplier of apple for more than 3 years All stuff has a lot experience of export, will give their best service
Price	Price will be the factory price, without extra profi

Nutrition

The proverb "An apple a day keeps the doctor away.", addressing the health effects of the fruit, dates from 19th century Wales. Preliminary research suggests that apples may reduce the risk of colon cancer, prostate cancer and lung cancer. Apple peels contain ursolic acid which, in rat studies, increases skeletal muscle and brown fat, and decreases white fat, obesity, glucose intolerance, and fatty liver disease. According to the United States Department of Agriculture, a typical apple serving weighs 242 grams and contains 126 calories with significant dietary fiber and vitamin C content.

Apple peels are a source of various phytochemicals with unknown nutritional value and possible antioxidant activity in vitro. The predominant phenolic phytochemicals in apples are quercetin, epicatechin, and procyanidin B2.

Apple juice concentrate has been found in mice to increase the production of the neurotransmitter acetylcholine.[75] Other studies have shown an "alleviation of oxidative damage and cognitive decline" in mice after the administration of apple juice. Fruit flies fed an apple extract lived 10% longer than other flies fed a normal diet.
