THE MAIN INGREDIENTS OF THE GOJI BERRY ARE:

18 amino acids: including all essential amino acids
21 trace elements: including germanium, helps in the fight against cancer cells
More protein than whole wheat
spectrum of carotenoids
vitamin C
Vitamin B complex
Vitamin E, otherwise hardly found in fruits
Beta-Sitosterol: lowers cholesterol levels
Essential Fatty Acids
Cyperone: has a positive effect on the heart and blood vessels
Sesquiterpenoid: antibacterial
Betaine: improves memory and accelerates muscle growth

Storage

1. Goji barbarum contains sugar, and high temperature in summer tends to soften goji. And goji is exposed to the air, it will absorb moisture and get damp and deteriorate. Therefore, goji berries need to be stored in a cool and dry place.
2. Goji barbarum should be stored in a low-temperature environment to reduce the activity of bacteria and keep food from deteriorating for a long time. Refrigerate (the temperature is preferably 0-4 degrees) to save.
